SERGIO CEPEDA

ENGINEERSOFTWARE

PRESENTATION:

I like to solve challenges as a team, I have great soft skills. I am passionate about technology all the time I am looking to learn more and know new technologies.

WORK EXPERIENCE

no-country-digital-bank-backend developer

- Along with 4 developers, stack MERN was used
- SCRUM for the project
- My contribution in the database was to create the models
- non-relational database with mongoDB
- Create user registration, authentication,
- movement and balance of the user and protection of
- routes.
- We also do daily daylis with the team
- to evacuate any problem both in the
- backend as the frontend
- currently working on the project.
- Constant communication with our TL

WORK EXPERIENCE

HENRY -rapi-rest- backend d

Together with 8 developers, the PERN stack was used and SCRUM for the project

My contribution was creating a model in a database, not relational.

Connect to an external api and create registry routes, user, reservations, review, creation of restaurants, types of cuisines and find restaurants by neighborhood.

We also do daily daily with the team complete, both backend and frontend to evacuate any problem that occurs both in the frontend as in the backend

Constant communication with our PM

EDUCATION

HENRY BOOTCAMP AND SELF-
TAUGHT

algorithms

data structure

Git | GitHub

CSS|Modules| Components

JavaScript |TypeScripts

React | Next |Redux

Node | Express.js

Mongo | Mongoose

PostgreeSQL| Sequelize

Scrum| Jira | Trello

WORK EXPERIENCE

HENRY -food-fullstack-developer

Use an external api where I consumed different recipes of international meals.

Create relational database models with postgresSQL with sequelize as orm to interact with the database with javascripts.

For backend use in node.js with express.js like framework for creating routes.

For the frontend use react.js , react-redux, redux and css pure without any external library.

video: <https://youtu.be/jmUakQ7XQiY>

I have more than two and half year of experience developing applications for clients both individually and in groups. Both on the frontend and backend

portfolio | my projects

In the section my work you can find all my projects, what I did and what I will continue to do. For the In general, I upload a project, even if it is small, per week. both to the portfolio, as well as on linkedin.

You can also contact me by sending me a email in the same portfolio in the section of contact me.
